## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 4-6, 23-29 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on April 22, 2004.

### ***Response to Arguments***

3. Applicant's arguments filed on July 22, 2004 have been fully considered but they are not persuasive.

Applicants argue that the examiner is mistaken in the ways that slurries could be mixed and that it is the application that teaches the agitation of water before adding the slurry and that the examiner's assertion is just hindsight<sup>1</sup>. This is not convincing because the examiner stated the common ways of mixing, specially agglomerating substances.

Obviousness can be based upon common knowledge of examiner. *In re Uhlig*, 54 CCPA 1300; 376 F2d 320; 153 USPQ 460. This is not only common knowledge but also common sense and the court has not eliminated common sense in the making a rejection. Since applicants have stated that the stirring of the liquid before the addition of the

fiber(s)/pulp is applicant invention, evidence of the common knowledge in the art of this fact is presented by the following Patents and/or Publications, attached: US Patent No. 4,955,723; 5,211,475; 5,511,876; 5,580,168; 5,951,161 and 6,592,246 to mention a few. Also the Article "Application Technology: Materials, Mixing and Mixtures" of November 25, 2002, see specially page 1, which recites " Fill the spray tank with water to ½ of the total spray volume required and start agitation. Add the different formulation types..."

#### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
